◆ ABOUT [Ad-free] "Unfair Wheel - Spin the wheel" It's a manipulable decision-making app that allows you to create your own custom wheels with up to 100 labels and spin away with cheat! *App name will be "SpinTheWheel" Note : Some Realme, Oppo, Vivo, Xiaomi, and Huawei models have reported issues with spin animations not starting. We are currently working on a solution. We apologize for the inconvenience, and appreciate your patience.[UPDATE] We have implemented solutions for these issues in the version 3.7 update. We would appreciate it if you could let us know through your reviews whether they have been resolved. ◆ KEY FEATURES · Adjust the weight/ratio of each entry · Create wheels with up to 100 entries · Spin the wheel with a swipe gesture · Fullscreen spinning experience · Customize font colors and wheel colors for each entry · Save your custom wheels (up to 100 wheels supported) · Choose from 10+ pre-designed templates like Yes or No, Pick a color, and more · Get random results with the Random mode · Use the Cheat mode to get desired results every time · Tap to stop the wheel from spinning · Display the probability of stopping at the result entry for a sec · Enjoy a simple and smooth spinning experience · The spinning speed adapts to your swipe speed · The startup wheel will be the last wheel you used · Customize the result message that appears when the wheel stops · Your entered entries and weights will remain intact after restarting · Set the settings button as transparent◆ HOW DOES THE CHEAT WORK? To enable cheats, go to the settings and activate the "Enable Cheat SWITCH." ► DEFAULT SETTING The wheel will stop at the exact position touched during the swipe gesture. ► EXTRA SETTING When you long-press the button "INFO.(ABOUT CHEAT)," the extra settings dialog box appears with two text boxes. The left box controls the clockwise spin, and the right box controls the counter-clockwise spin. Entering a value from 0 to 360 degrees in these boxes will make the wheel stop with the pointer pointing ahead of the spot touched by the swipe gesture by the angle of the entered value. For instance, entering 180 in both boxes will make the pointer point to the position directly opposite the spot touched during the swipe, regardless of the rotation direction.◆ HOW TO PLAY 1 . Launch the app and press the gear icon in the lower right corner to access settings 2 . Enter the entries on the left and their weights on the right in the center text boxes, starting from 1 without skipping. Use the color changer to customize font and wheel colors for each entry 3 . At the top, you will find a text box where you can enter a title. Enter your desired title in this box. To customize the font size of the title, use the box located to its right. Additionally, to adjust the font size of the wheel's entries, use the box further to the right 4 . Now you have your very own custom wheel! Press the "SPIN!" button on the upper right to play! ◆ Q&A Q . I have overwritten the template. Can I undo it? A . Yes. Go to settings, press Load to access the Load and Save screen, and load the Data at the bottom to restore the templates. However, data saved from the 5th to 14th position from the top will be lost Q . When returning from settings, the action bar will remain and cannot be played in full screen A . To prevent this issue, simply turn off the keyboard when you are done typing on settings Q . How do I make the settings button transparent? A . Press and hold the settings button Having a hard time deciding something? Let us help you decide in a fun way!
